

TECHNICAL BULLETIN: Gas Safe Certificate Details

Dear Customer

Following several requests from our customers requesting a Gas Safe Certificate for a gas installation undertaken by ourselves, and recorded on our Site Installation Sheet, we have been advised by Gas Safe that there is no need for or legal requirement to provide this additional Gas Safe Certificate, and that our standard Site Installation Sheet is a satisfactory record of and certification for the installation.

However, if you still require an independent Gas Safe Certificate for gas connection works completed by us, then for an additional administration charge to cover costs we can request this service from the Gas Safe Register and arrange to provide you with this additional certification.

If you require this additional certification then please contact your Account Manager who will be happy to arrange this for you.

Martin Appleyard

Operations Director & Head of Compliance
